HOTEL LOS YÁMANAS
SUSTAINABLE MANAGEMENT POLICY

Hospitality that cares for people and the environment

At Hotel Los Yámanas, we understand sustainability as a way of managing hospitality responsibly. We work to reduce our impacts, protect Ushuaia's natural and cultural heritage, promote decent work, and continuously improve our management.

COMPLIANCE AND TRANSPARENCY We comply with environmental, labor, health, safety, and heritage-protection regulations applicable to our activity.

ENERGY AND WATER We measure and manage our consumption, maintain efficient equipment, use solar energy, and assess new renewable alternatives. We apply flow reducers, loss-control measures, and responsible water-treatment technologies.

WASTE AND RESPONSIBLE CONSUMPTION We separate waste, reduce paper use and disposable items, promote reusable bottles, and deliver special waste to authorized managers for proper treatment.

PRODUCTS AND PURCHASING We prioritize biodegradable products for cleaning and laundry, and we consider durability, efficiency, lower waste generation, and responsible suppliers.

BIODIVERSITY AND DESTINATION We preserve the hotel's forest without intervention, care for the coastal environment and the Beagle Channel, and participate in environmental and community initiatives such as Onashaga and Fundación Garrahan.

PEOPLE AND RIGHTS We promote equal opportunities, respect, inclusion, and decent working conditions. We reject child or forced labor, exploitation, discrimination, harassment, and violence.

PARTICIPATION AND CONTINUOUS IMPROVEMENT We train our team, communicate good practices to guests and suppliers, track progress, and periodically review our Hoteles Más Verdes Action Plan.

YOUR PARTICIPATION ALSO MATTERS

During your stay, we invite you to use water and energy responsibly, avoid disposable items, separate waste, and respect the forest and the coast.

Building a more sustainable destination together
